Subject: Final Remedial Action Report
Mercury Refining Superfund Site, Colonie, New York

Dear Mr. Mongelli:

On behalf of the Mercury Refining Site Remedial Action Group (the Group) and at the direction of de maximis, the Group's Project Coordinator, Brown and Caldwell Associates (BC) is submitting the enclosed final version of the Remedial Action (RA) Report for submittal to the United States Environmental Protection Agency (USEPA). This submission satisfies requirement II.D of the Remedial Action Statement of Work (RA SOW) to submit a final RA Report after approval of the modifications in response to USEPA's comments on the draft RA Report. The enclosed final RA Report, certified by the Project Coordinator and the Engineer of Record, documents that the remedy for the Site was implemented in accordance with the approved design plans.

Per your discussions with the Project Coordinator, the RA Report is being submitted with the draft as-built drawings associated with the storm sewer relocation performed on the Allied Building Products property (Appendix B of the RA Report) as well as those associated with implementation of the in-situ solidification/stabilization remedy component (Appendix K of the RA Report). These drawings have not been signed/stamped by a Professional Surveyor licensed in the State of New York (NYS LS) as required by the Technical Specification (Appendix D of the RA Report). Once the signed/stamped drawings are received from WRS/NorthStar, copies will be provided to replace the draft drawings included with this submission. USEPA did not have any comments on the draft drawings submitted with the draft RA Report and therefore no further revisions to the drawings will be made.

In addition, this transmission includes a CD containing the complete version of the RA Report. If you should have any questions, comments or require any additional information, please do not hesitate to contact Geoffrey Seibel (Project Coordinator) at 610-435-1151 or the undersigned at 201-574-4765.

Very truly yours,

Brown and Caldwell Associates
